As outlined in the Scope of Services below (Section 1.3), the EACGDD #1 and Parish hereby requests qualifications from experienced and qualified firms to provide the needed services.

1.2 Background

The EACGDD #1 and Department of Public Works are soliciting qualification statements for surveying and SUE services to provide the EACGDD #1 and Parish with the scope of work requirements listed in this solicitation in compliance with all federal and state regulations. The agreement will be task driven and will be on a cost reimbursement, not to exceed basis with payment terms to be negotiated with the selected firm. The maximum amount of fees that can be paid for each task will be determined by the local, state or federal funding source and may require adjustments in the proposed contract amount.

1.3 Scope of Services

The Consultant shall perform professional topographic surveying and related services for parish-wide projects covered by an IDIQ contract under separate Task Orders (TO). All work will be parish-wide. The Consultant shall be required to execute a TO which shall specify the scope of services, contract time, and compensation. Each TO shall become a part of the IDIQ contract. Each task order will note which entity the work is for EACGDD #1 or Parish and the task orders can be directed for lesser requirements than stated in this RFQ.

The services to be rendered for this IDIQ Contract shall consist of the following:

Surveying Services

Topographic Survey

Subsurface Utility Engineering (SUE)

Topographic Survey shall consist of all services required to make a complete topographic survey, in English units of measure, as required for the proper design and layout of the Project. The Louisiana Professional Engineering and Land Survey Board (LAPELS) standards shall govern this survey

The survey shall include, but not be limited to the staking of centerline when required and when physically possible and, where this is not possible, to the running of all ground traverses necessary to compute and establish centerline. Aerial photogrammetry may be used when feasible and by written agreement with the Parish in developing the topographic surveys. This work shall include, for the control of the field survey and later use, the establishment of referenced iron rods along the Project, as may be necessary, to define the centerline and of a referenced system of bench marks on a closed level circuit. The survey shall also include the location and establishment of ownership of all utilities in the way of construction as specified in the manual. The Consultant's attention is specifically directed to the requirement in the manual whereby a sketch of the survey line shall be submitted to the Parish for approval immediately after the initial establishment of said line and prior to proceeding further with the survey. The Project survey control and horizontal alignment shall be based on the Louisiana State Plane Coordinate System, (NAD-83), as determined by G.P.S. observation. The Project survey control and vertical alignment shall be based on the 2009 Ascension Parish approved benchmarks.

Subsurface Utility Engineering- Consultant will provide accuracy and economy in project-driven utility inventories, through the application of Technologies that are not otherwise readily available to the Parish, and to enable the Parish to assign various tasks such as utility coordination, etc., on parish-wide projects using Subsurface Utility Engineering (SUE).
