

### **\*\*\*NOTICE\*\*\***

After extensive investigations, it has been determined the network of benchmarks that Ascension Parish originally required surveyors to reference all surveys to has not changed significantly. Therefore, the Parish is resending the notice requiring surveyors to use the RINEX data from the Parish CORS Stations to arrive at their base elevation. As of May 2, 2018, the Parish is reverting to the original method of referencing all surveys to the Parish's Benchmark Network.

An interactive map with the Parish Benchmark Network can be accessed at <http://maps.apgov.us/benchmarks/>

For questions, please contact the following Parish personnel:

Darrel Primeaux
