Darrow Water Line Project Nears Completion as System Moves into Final Testing Phase

Darrow, LA - We're pleased to share an important update on the ongoing water line replacement project in Darrow.

Ascension Water Company has successfully completed the line replacement phase and is now proceeding with disinfecting and flushing the new system. This work is being carried out in accordance with Title 51 requirements to ensure the highest safety and quality standards.

Sampling of the new line is scheduled for Wednesday, April 15, 2026. If all test results are approved by the State Department of Health and Hospitals, we anticipate the line will be fully operational and placed into service by Friday, April 17, 2026.

We sincerely appreciate your patience and understanding throughout this process. We recognize this project may have caused some inconvenience and apologize for any disruption. Our team remains committed to delivering reliable, high-quality water service to the community.

If you have any questions or concerns, please call 225-450-1200.
