Wording for "DESCRIPTION" is to be provided by the Owner.

All quantities are estimated. The contractor will be paid based upon actual quantities as verified by the Owner.

PROJECT NOTES

1. Asphalt Concrete paving items – Longitudinal Smoothness Quality Control - The contractor is to supply the Project Engineer with a 10-foot metal static straightedge. The Project Engineer will identify areas in the Wearing Course of Asphalt Concrete pavement, both longitudinal and transverse, laid by the contractor that are more than ¼ inch when tested with the straightedge. The contractor will correct all individual bumps which are more than ¼ inch. All areas are to be corrected by grinding. In lieu of grinding, the Project Engineer may penalize the contractor \$800 per bump area.
2. All asphalt concrete patches are to be saw cut. Saw cutting is to be considered part of the patching item and will not be paid separately.
3. No road closures will be allowed unless authorized by the Project Engineer. At least 48 hours advanced notice is to be given should a closure be authorized.
4. No construction can begin unless all temporary construction signs are in place as per applicable DOTD Temporary Traffic Control (TTC) signage is in place. Flaggers, as referenced in the appropriate TTC must be present as determined by the Project Engineer.
5. Traffic control is to be provided as per DOTD Standard Plan Numbers TTC-00(A), TTC-00(B), TTC00(C), TTC-00(D), and TTC-01 through TTC-19 as applicable.
6. Bedding material is to be installed as per the latest version of DOTD Standard Plan BM-01.
7. Mailboxes are to be installed as per the latest version of DOTD Standard Plan MB-01.
8. The contractor is to give the Parish and the Parish' Testing Lab two (2) working days' notice before all required Proof Rolling of a road base course.
